

Connector mounting holes

PCB mounting holes

Front panel mounting

Connector mounting holes

ESD intercepting pins located on a pre-set pattern to intercept ESD events on signal carrying contacts from 4kV to 25 kV

Metal ESD faraday shield staked to front of insert protect connector from accidental discharge into signal contacts

Robust machined aluminum shell

Internal EMI grounding strap, provides EMI protection to D38999 III standards

Connector to connector dynamic seal

Rear panel mounting

Conductive sealing gasket provides a water and EMI seal
